Meter Change-out Program is Starting!

Within the next few weeks (early May), all accounts in the District will be receiving a post-card from Thielsch Engineering, who we have contracted to do the actual meter replacements by installing new cellular meters. This program will greatly benefit the District – it will enable us to received meter readings – and we appreciate your cooperation. If you are the property owner, and have not received a postcard by mid-May, please contact the Water District Office. Otherwise, all scheduling is to be done directly with Thielsch.

An example of the first postcard is shown below: Please promptly respond to the postcard and set up an appointment.
